## Pro Dance Boots

### Chrome Leather Sole Information:

#### **Can I only wear these *Evenin' Star Pro Dance Boots* on a dance floor?**

No, it will cause the sole to glaze over more quickly because of the buildup of dirt particles. The boot sole will soon take on a normal leather sole like look. Only the use of a Sole Cleaning Brush or "The Cube" Dance Sole Cleaner will restore the "fuzzy" to the sole providing the optimum dance-ability of the boot. The chrome or split leather that is used for the sole is one of the strongest leathers available. With just a little common sense and the sole cleaning brush or "The Cube", the boot may be worn in a practical manner outdoors.

#### **Will water ruin my *Evenin' Star Pro Dance Boots*?**

One should exercise common sense and avoid contact with any wet or oily surface. Treat your boots like you would a good pair of shoes. As with any shoe or boot, if you get the sole wet, take them off and allow them to dry. Then use the sole cleaning brush or "The Cube" to restore the suede ("fuzzy") like look.

#### **What do I do when my soles of my *Evenin' Star Pro Dance Boots* wear out?**

These soles are tough and twice the thickness of a dance theatrical shoe. They will last as long as a normal boot sole. When they do wear out, you can contact us for repair at a nominal fee.

#### **How do I care for my *Evenin' Star Pro Dance Boots*?**

Treat the uppers like any good pair of boots. Use a good quality polish like Meltonian Shoe Cream to cover and condition the leather. We carry 41 Meltonian Shoe Cream colors in our website including white. Use a boot bag when carrying your boots and cedar boots trees help pull out the moisture left in you boots after a night's dancing. Also, use Boot Shapers which helps maintain the shape of the upper shaft of your boots. And follow the suggestions above.
